

PUBLIC-RECORD SPECIMEN · NOT A CLIENT FILE

Dated Counterparty Note

One firm. One date. One signed record.

PREPARED	29 October 2026
PREPARED BY	George Agathangelou, Agathangelou Consulting
SCOPE	One entity and the MiCA services recorded against it in the named snapshot.
REGISTER SOURCE	ESMA interim MiCA register, snapshot 22 October 2026.

01 · THE RECORD

LEGAL NAME	AMINA (Austria) AG
BRAND	AMINA EU
HOME STATE	Austria
AUTHORISATION DATE	29 October 2025
RECORDED SERVICES	Custody & administration; Exchange for funds; Exchange for crypto; Portfolio management; Transfer services
SOURCE	ESMA interim MiCA register, snapshot 22 October 2026. Register-level source; not an entity-record link.

THE READING

The snapshot records AMINA (Austria) AG as a MiCA-authorised CASP in Austria with five recorded services. The register does not record execution of orders, placing, reception and transmission, or advice for this entity. Those distinctions matter when a mandate treats “trading” as a single permission.

WHAT THIS SPECIMEN IS NOT

No suitability conclusion. No recommendation to onboard or avoid the firm. No legal opinion. No current-status confirmation. This is a dated reading of one public snapshot, prepared to show the structure of the paid note.

Prepared for illustration only. In a paid note, the reader, scope and sign-off are named in the written scope letter.

02 · WHAT THE NOTE ADDS

ENTITY JOINS

No other entry under the AMINA brand was returned in the 22 October 2026 snapshot. That is a finding about this snapshot, not proof that no affiliate holds a licence elsewhere. The paid note states the search it ran and the result it did not find.

SCOPE MATCH

The public website reviewed on 29 October 2026 presents custody, trading, staking and discretionary mandates. The snapshot records custody and portfolio management. It records exchange for funds and exchange for crypto, but not execution of orders. "Trading" is the firm's public label, not a register permission. Staking is not a separate Title V service, so it is not treated here as a recorded permission. Any gap is stated rather than inferred away.

DATE DISCIPLINE

Every finding carries the capture date, the named dataset and the exact register row. A reader can reproduce the check without asking the firm.

STATED LIMITS

A snapshot can establish what the register said on the capture date. It cannot establish current authorisation, the firm's conduct, the services it actually provides, or whether a particular onboarding decision is appropriate. Confirm the current record with ESMA or the Austrian FMA before relying on it.

03 · THE JUDGEMENT, AND ITS LIMITS

On this record, the register supports the five recorded services. It does not support reading the public "trading" label as execution of orders. It does not say whether staking is offered under a separate legal basis. Those are questions for the firm or the authority, and the note does not turn them into a conclusion.

SIGN-OFF

Prepared by George Agathangelou, Director, George Agathangelou Consulting Services Ltd.

Signature: _____ Date: 29 October 2026

This specimen is unsigned. The paid note is signed and dated after the scope letter is accepted.

04 · SOURCE APPENDIX

The register row

LEGAL NAME	AMINA (Austria) AG
HOME STATE	Austria
AUTHORISATION DATE	29 October 2025
RECORDED SERVICES	Custody & administration; Exchange for funds; Exchange for crypto; Portfolio management; Transfer services
CAPTURE DATE	22 October 2026
DATASET	ESMA interim MiCA register, CASP records

WHERE TO VERIFY

ESMA register hub:

<https://www.esma.europa.eu/esmas-activities/digital-finance-and-innovation/markets-crypto-assets-regulation-mica>

Austrian competent authority: <https://www.fma.gv.at/>

METHOD

1. Read the exact legal name from the named snapshot, not a brand or shortened name. 2. Check the same brand for other entity entries in the snapshot. 3. Read the recorded services as permissions, not marketing categories. 4. If the scope includes a public-website comparison, quote the public description and mark only the differences the sources can support. 5. Record the capture date and every limit in the document.

SPECIMEN NOTICE

This document is a public-record specimen prepared for illustration. It contains no client information and no instruction to onboard or avoid any firm. It is not legal, investment, tax or crypto-asset advice. The paid note is prepared under a written scope letter and is signed and dated before delivery.
